

How to download data

After creating a user account and logging in, you can download data for free - the following guide will guide you to download data from www.download.kortforsyningen.dk:

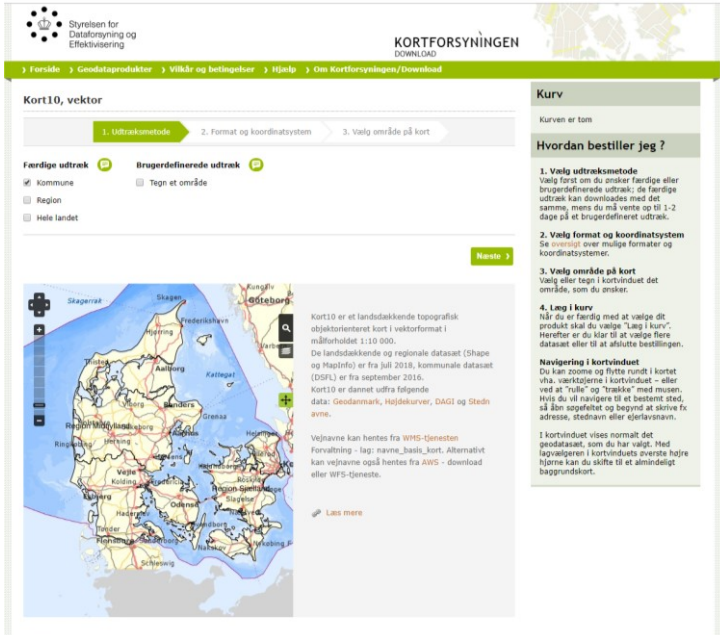

1. On the front page in the menu, click on 'Geodataprodukter'

2. Then you will get a list of all of our data available to download (see 'about data' for more information about the specific dataset)

3. By clicking on the dataset you would like to download, you will be forwarded to a page like this, where you have to choose your data extraction method

Terminology:

Udtræksmetode = Extraction Method

Færdige udtræk = Final extractions

Kommune = Municipality

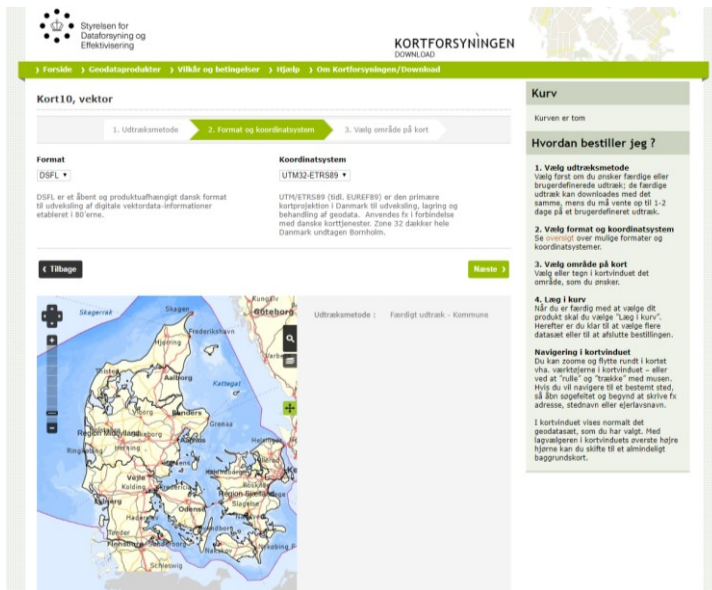

Region = Region

Hele landet = Nationwide

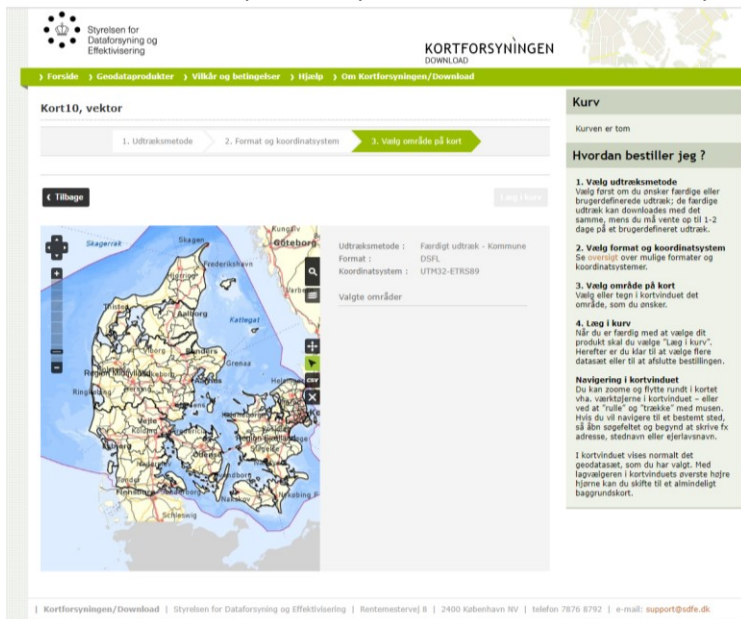

Brugerdefinerede udtræk = Custom Extraction

Tegn et område = Draw an area

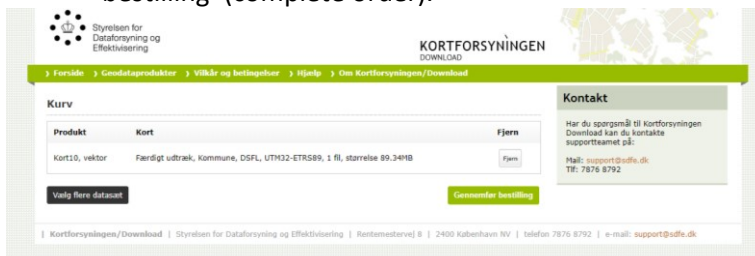

4. After choosing your extraction method you click on 'Næste' (next) and you will be forwarded to the next step, where you have to choose format and coordination system

- After choosing format and coordination system, you click on 'Næste', and you will be forwarded to the next step, where you have to choose the area you are interested in.

- After choosing the area, you click on 'Læg i kurv' (add to cart) and you will be forwarded to your cart, where you can choose to 'Vælg flere datasæt' (select multiple dataset) or 'Gennemfør bestilling' (complete order).

- If you choose 'Vælg flere datasæt' (select multiple dataset), you will be forwarded to the frontpage and you can add more datasets to your cart.

8. If you choose 'Gennemfør bestilling' (complete order), the system has to process your order and you will be forwarded to a page that states 'Bestilling gennemført' (Order complete), click on the link 'downloade dine ordrer her' (Download your order here).
